

Mrunal J. Patel

Generative AI Engineer | Agentic AI Systems

Surat, Gujarat, India | +91 91578 99743 | patelmrunal7373@gmail.com | linkedin.com/in/mrunallpatel | github.com/patelmrunal

SUMMARY

Computer Engineering graduate (CGPA 7.96) with 1+ year of production experience building LLM-powered autonomous agents, RAG pipelines, and generative AI systems across two concurrent internships — shipping 15+ live workflows and 5 publicly deployed projects. Nationally ranked Top 5 of 850+ at Intel's AI for Manufacturing Program. Focused on retrieval-augmented generation, multi-step agent orchestration, and tool-integrated LLM pipelines from prototype to cloud deployment.

TECHNICAL SKILLS

Generative AI & LLMs: LLMs, Prompt Engineering, OpenAI API (GPT-4o), LangChain, Chain-of-Thought Reasoning, Hugging Face

Agentic Systems: Multi-step Tool Orchestration, Autonomous Task Agents, Memory-augmented Pipelines, n8n Agentic Workflows

RAG & Retrieval: FAISS, ChromaDB, Embedding-based Retrieval, Semantic Search, Context-Injected Prompting

ML & Data: PyTorch, TensorFlow, Scikit-learn, Bidirectional LSTM, Neural Networks

Backend & Deployment: Python, FastAPI, REST APIs, Node.js, PostgreSQL, MongoDB, Supabase, Netlify, Git

Integrations: Twilio WhatsApp, YouTube Data API, Instagram Graph API, Discord API, WooCommerce API

EXPERIENCE

AI Automation Engineer (Intern)

Jan 2026 – Jul 2026

RohTreMedia — Remote

- Designed and deployed a fully autonomous content agent that scans 20 YouTube channels, filters football prediction/review content, and drafts complete articles (title, slug, URL, body) — with a self-evaluation loop that scores each draft against an SEO rubric and regenerates up to 2 revisions before auto-selecting the best-scoring version.
- Extended the agent to auto-generate and host thumbnails (Cloudflare) and publish end-to-end with zero manual writing, running autonomously 24/7 with Telegram status alerts on source channel and article volume; lifted publishing efficiency 95%, cut writer time 5x, and held ~90% published-detail accuracy under spot-check review.
- Built an LLM-powered WhatsApp lead-nurturing agent (Twilio + GPT-4o) that cut response time 90% and lifted response efficiency 80%, with a live dashboard syncing lead status from ad sources to Excel.
- Deployed an autonomous AI agent that queries employees for task status and updates a live dashboard, saving 1+ hr/day per manager and improving task management efficiency 70%.
- Automated WooCommerce product onboarding (image-parsing → auto-generated title/description/price) and built an n8n editorial workflow (draft → review → publish), cutting manual upload effort 85% and publishing time 90%.

Generative AI Intern

Jun 2025 – Nov 2025

NextGen World — Surat, Gujarat, India

- Shipped production-grade generative AI automation tools (n8n, Make.com, OpenAI APIs) and AI agent-based SaaS products with multi-modal LLM integrations, contributing directly to the company's AI-first product roadmap across education and service verticals.

AI Intern

Feb 2025 – Jul 2025

Intel Digital Readiness Program — Virtual

- Ranked Top 5 of 850+ nationally — built an LLM-powered Dispatch Planning & Warehouse Optimization system using chain-of-thought reasoning over real-time logistics constraints; presented to Intel Global Leadership, Asia-Pacific & Japan Director, and GTU Vice Chancellor.

KEY PROJECTS

RAG-Powered Chatbot Suite

LangChain · FAISS · OpenAI API · Python · Streamlit

- Built 3 production RAG applications — document Q&A, memory-augmented chatbot, policy-compliance bot — with chunking, embedding generation, and context-injected prompting for hallucination-controlled responses over private corpora.
- Repositories: RAG-APP · CHAT-BOT · policy-rag-bot (github.com/patelmrunal)

Sentiment Analysis API

PyTorch · FastAPI · BiLSTM · Streamlit

- Trained a Bidirectional LSTM achieving 85.3% validation accuracy on the IMDB 50K dataset; deployed as a RESTful FastAPI service (POST /predict, GET /health) with a live public Streamlit demo — sentimentapi.streamlit.app.

EDUCATION

Prime Institute of Engineering & Technology (GTU), Gujarat, India

Graduated May 2026

B.E., Computer Engineering — CGPA: 7.96

Government Polytechnic Valsad, Valsad, India

May 2022

Diploma, Chemical Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Top 5 of 850+ — Intel AI for Manufacturing National Program (2025); presented to Intel Global Leadership, Asia-Pacific & Japan Director, and GTU Vice Chancellor
- 15+ production AI workflows and 5 live public projects deployed across two concurrent internships, including REST APIs, RAG chatbots, and autonomous agents
